## 1. Actions performed

In the frame of realisation of activity 1.3 – Development of structure and content of curriculum in field of Management of Product Development and Innovations management at master/specialist and doctoral level University of Niš (UNI) developed a new module Management of Innovations and Product Development at existing master study programme of Engineering management. The complete study programme Engineering management was reaccredited due to introduction of new module Management of Innovations and Product Development.

## 2. Outcomes

The following results were achieved during the project realisation in curricula reform in frame of WP 1.3 – Development of structure and content of curriculum in field of Management of Product Development and Innovations management at master/specialist and doctoral level:

1. Introduction of new module Management of Innovations and Product Development at master programme Engineering Management at Faculty of Mechanical Engineering of UNI in the field of Management of Product Development and Innovations management. The module belongs to master course structured according to the three cycle system, has duration of one year and carries 60 ETSC. The master course is reaccredited, although it was accredited in 2012, to accommodate the introduction of new module, by Commission for accreditation and quality audit of RS for 128 students for Serbian as a programme language. Due to Faculty internal regulations the module has a maximal number of 30 students and the minimal number is calculated according to number of applied students so all modules on study programme would be operational. In the first two years of enrolment (2014/15 and 2015/16) the module has enrolled 37 students.
